

dtrash records

"For those who know it, it needs no introduction. Probably the best Digital Hardcore label nowadays. All releases available online (something to admire in current times), and many of them are top quality stuff. Breakcore/Speedcore/Digital Hardcore/Noise/Dark Ambient/IDM... this label shows everything packed under a form of irreverence and mostly, anti-commercial feeling. Worth listening and supporting, and probably one of a kind. Not for the weak-minded..." - www.Discogs.com User Comment on d-trash

Formed in 1998, Canada's D-TRASH Records started as an online collective by members of CPUWAR and DJ RABIES as the beginnings of an international network of exciting and extreme North American electronic music artists. In 2000, the group formed into an official record label, headed by D-TRASH artist SCHIZOID, the label now offering pressed CD releases for sale in stores; as well, continuing the practice of releases of full-length albums through the internet as MP3 for download. The label set the underground on fire with an arsenal of genre-defining artists, sprouting into an international beast, with artists in virtually every country in the world. In 2003 D-TRASH Records CDs were picked up for a North American distribution deal with infamous German label DIGITAL HARDCORE RECORDINGS, WITH many D-TRASH artists also appearing on the 3xCD DHR compilation "Don't Fuck With Us". To date, the label now has put out 8 professionally pressed CDs available in stores/distros worldwide and have now released over 100 full-length albums available for free MP3 download on the www.dtrashrecords.com site and plans to continue to foster the next generation of cutting-edge noise-makers. In 2008, D-TRASH Records LOOKS BACK ON THEIR first decade OF OPERATIONS with this milestone 100th release; an explosive DVD of our artists past and present music videos!

D-TRASH head SCHIZOID: *"It's funny because we never really started with the purpose of that typical "music industry" aim, as far as things like "music videos" they've almost seemed like an after-thought in the grand scheme of the type of the DIY thing we've been trying to do. Now at this point we find we actually have quite a collection of artists' music videos from our catalogue and I think they show off a lot of the rawking spirit and diversity of our the labels' material. So Check out these videos we share with you and help us celebrate our 10th year and our 100th release!"*
